FreshservicePS
Open-Source Freshservice PowerShell Module

- **Automate** Support Tasks
- **Improve** Accuracy
- **Gain** Technician Time Back
- **Boost** Productivity

Calling all Freshservice PowerShell users!

If your resources are tied up creating scripts, Flycast Partners may have already taken care of the complicated work for you. Developed by the team that earned Freshworks Global ITSM Strategic Partner of the Year, FreshservicePS is an open-source Freshservice PowerShell module created to complement your Freshservice instance.

Access
160+ commands to automate, integrate, and customize Freshservice

Simplify
complex API calls to the Freshservice REST API using simple commands

Execute
time-consuming and routine tasks in a fraction of the time

Achieve more
with less effort, gaining time back and freeing up resources

Enhance your Freshservice instance without requiring the expertise of a developer.

FreshservicePS offers both new and experienced PowerShell users a straightforward and intuitive method to streamline Freshservice and establish a more unified approach to Enterprise Service Management.

- **Remove Manual Efforts:** Eliminate thousands of manual Administration hours
- **Automation:** Save thousands of hours updating tickets, changes, assets, projects, and much more
- **Data Transformation:** Speed up the movement of data in and out of Freshservice
- **Precision Reporting:** Advanced filtering for faster, up-to-date reporting

Success Story

"Intuitively structured so that even a novice can operate at an expert level."

One notable success story comes from a consumer electronics organization ranked among the top 10 largest electronic component distributors globally.

freshworks North American **MOST VALUABLE** Partner of the Year
